Reliable solutions

HYDRAULIC EXCAVATOR

Model Code: ZX70-5G / ZX70LC-5G
Engine Rated Power: 42.4 kW (56.9 HP)
Operating Weight: ZX70-5G: 6 650 - 6 950 kg
: ZX70LC-5G: 6 710 - 7 020 kg
Backhoe Bucket: ISO Heaped: 0.13 - 0.33 m³

More Production with Less Fuel

- · 7% less fuel consumption
- · 22% more engine torque
- · Improved heat balance
- · Low-effort pilot lever

Operator ComfortPage 6

- · Comfortable operating environment
- · Full-auto air conditioner (Standard)
- · CRES cab

Highest Criteria of Sturdiness and Durability

Page 7

- · WC thermal spraying at arm-bucket joint
- · Reinforced bucket (Optional)
- · 4-side reinforced arm (Optional)
- · Track frame undercover (Optional)

Hitachi Heritage of High Maintainability

- · Fuel double-filters (Standard)
- · Dust-proof indoor net
- · Easy-to-clean big fuel tank
- · Battery disconnect switch (Optional)

Hitachi Support Chain

· Parts and service

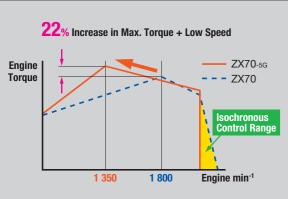

Note: The pictured ZX70 is equipped with an optional blade.

More Production with Less Fuel. Meeting Two Competing Needs

New electronically-controlled engine

Engine torque vs. engine min-1

7% Down Fuel Consumption*

Hitachi fuel-saving technology is more evolved than ever. The electronically controlled engine can curb fuel consumption behind the electronic governor, clutch fan, and isochronous control, which is one of fuel-saving technologies that can automatically control engine rpm through the electronic governor. This can suppress wasteful engine speed increase when big output is not needed, leading to less fuel consumption.

*Hitachi measurements in P mode under standard digging test conditions

22% Up Engine Torque

The new engine is designed to increase its maximum torque to keep running without speed drop at high altitudes with thin air and in hot summer season. At its maximum torque, the speed is kept low to ensure stable performance even under heavy loads.

Improved Heat Balance

Even at high temperatures in summer or in continuous long hours operation, the ZX70 can lessen overheating, as cooling efficiency increases: heat balance is up 4% in engine coolant, and up 12% in hydraulic oil, compared to the conventional.

Low-Effort Pilot Lever

The new fingertip-control pilot lever reduces operator fatigue in long hours operation. This pilot lever resembles the one proven on the ZX200 in the larger class.

lown equipped with an optional 4-side rainforced arm and pre-cleaned

Enhanced Operator Comfort with Refined Controls and Cab Interior

Highest Criteria of Sturdiness and **Durability Gives Higher Productivity**

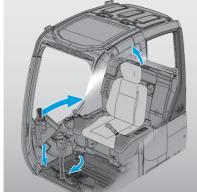

Comfortable Operating Environment

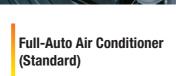

The cab is improved to enhance operator comfort and controllability. The monitor panel is positioned for easy reading from the operator. Twin analog meters are easy to read operating status. The simple-to-control switch panel is within easy reach. The comfortable vinyl-made operator seat is provided with a headrest and armrests, and is precisely adjustable to operator's build. It can be reclined and slid for pleasant positioning.

Monitor panel indicators are shown lit for demonstration. Auto Idle and indicators disable

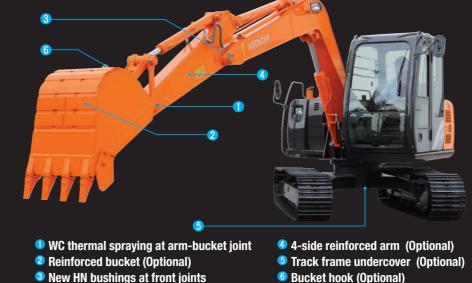

The full-auto air conditioner can keep preset in-cab temperatures by blowing fresh air. Air flow and outlets are adjusted automatically. Bi-level air flow makes it possible to warm leg space and cool head space simultaneously.

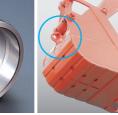

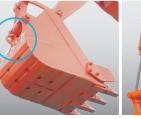

WC Thermal Spraying at Arm-Bucket Joint

WC (Tungsten-Carbide) thermal spraying is applied on surfaces of the arm-bucket joint to form hardening layers to reduce wear and jerking significantly.

Reinforced Bucket (Optional)

The flat bottom type bucket protects its welds with wear plate. The 0.28 m³ reinforced bucket is provided optional with reinforcing plates at its bottom.

4-Side Reinforced Arm (Optional)

The arm top is strengthened with reinforcing plates on its four sides to withstand high loads.

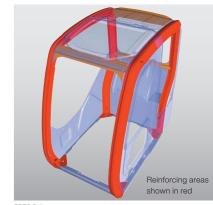

Track Frame Undercover (Optional)

The track frame bottom is protected with a full-length undercover against obstacles.

CRES* Cab

The CRES cab is reinforced with high-rigidity steel tubes at corners to significantly increase strength and rigidity for higher safety.

*CRES: Corner Reinforced Structure

Neutral engine start system

The pilot control shut-off lever is

provided with a neutral engine start

system that permits engine starting

only when the pilot control shut-off

lever is in Lock position.

Hitachi Heritage of High Maintainability to Reduce Downtime

Fuel Double-Filters (Standard)

Fuel double-filters are utilized in a fuel line from fuel tank to engine to avoid plugging. Also, a solenoid fuel pump is provided standard to release air if water is mixed in fuel or fuel runs out.

Dust-Proof Indoor Net

The radiator is provided with a detachable dust protective net at its front to avoid dust entry. The net is made of three-split type for easy, quick servicing. An air nozzle port at the radiator top facilitates cleaning.

Easy-to-Clean Big Fuel Tank

The fuel tank has the ample capacity of 135 litters. Its inlet is sealed with a keyed cap for water proof type. At the bottom of the fuel tank a drain cock, which serves to easily discharge contaminants inside, and a bolted cleaning port for easy opening and cleaning.

Battery Disconnect Switch (Optional)

This battery disconnect switch is provided to avoid battery discharging and protect harnesses when the machine is not in use in winter or in long-term storage.

attery disconnect switch (Optional)

Hitachi Support Chain

Hitachi Support Chain is a full customer support system offered after buying a Hitachi machine.

Parts and Service

Hitachi full customer support is available every area on the globe for full customer satisfaction through Hitachi local dealers.

Parts

Hitachi Global Online Network, a parts supply system, is linked with Japan Parts Center, overseas depots and over 150 dealers abroad to deliver on-line parts information, including in-stock parts, order receptions, shipments and delivery period of over one million parts and components.

Genuine Hitachi Parts

Genuine Hitachi parts, meeting Hitachi stringent quality standards, are guaranteed according to Hitachi warranty standards. The use of genuine Hitachi parts, including engine, fuel, hydraulic oil and filters, may slash running costs, and extend machine life.

Ground Engaging Tools (GETs)

Hitachi provides an array of Hitachi Ground Engaging Tools developed and built for a variety of applications. Using high-quality, well-maintained GETs will help you get customers' trust.

Note: Some dealers do not handle Hitachi GETs

Remanufactured Components

Hitachi components are remanufactured according to the stringent remanufacturing standards at four factories around the world. They have high quality equivalent to new ones, and backed up by Hitachi warranty system.

Note: Some dealers do not handle Hitachi Remanufactured Components

Service

Extended Warranty — HELP

Hitachi Standard Warranty System is available on all new Hitachi machines. In addition, Hitachi offers Hitachi Extended Life Programs (HELPs) to suit customer expectations – protecting machines under tough operating conditions, avoiding unexpected downtime, and reducing repair costs.

Note: Warranty conditions vary by equipment.

Diagnostic Tools — Maintenance Pro

Electronic control system needs quick on-site solutions, apart from mechanical repairs. Hitachi's Maintenance Pro can diagnose machine failures in a short time by plugging a PC into a failed machine.

Technical Training

On-site servicing matters despite locations to keep the machine at peak performance and reduce downtime.

Technical Training Center (TTC), located in Japan, educates and trains service technicians and service support personnel coming from Hitachi dealers and factories on the globe according to the international training programs.

LIFTING CAPACITIES (Without Bucket)

Notes: 1. Ratings are based on ISO 10567.

- 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.

 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
- 4. *Indicates load limited by hydraulic capacity.
 5. 0 m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities without bucket.

EQUIPMENT

Standard and optional equipment may vary by country, so please consult your Hitachi dealer for details.

• : Standard equipment O : Optional equipment

ENGINE	
Air cleaner	•
Air cleaner double filters	•
Alternator 60 A	•
Auto idle system	•
Cartridge-type engine oil filter	•
Cartridge-type fuel pre-filter	•
Cartridge-type fuel main filter	•
Dry-type air filter with evacuator valve (with air filter restriction indicator)	•
Dust-Proof indoor net	•
Electric fuel feed pump	•
E/P mode control	•
Fan guard	•
Pre-cleaner	0
Radiator reserve tank	•
Water separator	•

HYDRAULIC SYSTEM	
Boom anti-drift valve	•
Control valve with main relief valve	•
E-P control system	•
Full-flow filter	•
One extra port for control valve	•
Pilot filter	•
Shockless valve in pilot circuit	•
Suction filter	•

CAB	
All-weather sound suppressed steel cab	•
AM-FM radio with digital clock	•
Ashtray	•
Auto control air conditioner	•
Cigarette lighter 24V	•
CRES Cab (Corner reinforced structure)	•
Orink holder	•
Electric horn	•
Engine stop switch	•
Evacuation hammer	•
Fire extinguisher bracket	0
Floor mat	•
ootrest	•
Front window washer	•
Front windows on upper, lower and eft side can be opened	•
Glove compartment	•
Hot & cool box	•
ntermittent windshield wipers	•
_ower cab front guard	0
OPG top guard Level I (ISO10262) compliant cab	0
Pilot control shut-off lever	•
Seat belt	•
Seat : fabric seat	0
Seat : mechanical suspension seat	0
Seat : vinyl seat	•
Seat adjustment part : backrest, slide forward / back	•

Upper cab front guard

4 fluid-filled elastic mounts

Global e-Service

MEMO

Hitachi Environmental Vision 2025

The Hitachi Group released the Environmental Vision 2025 to curb annual carbon dioxide emissions. The Group is committed to global production while reducing environmental impact in life cycles of all products, and realizing a sustainable society by tackling three goals — prevention of global warming, conservation of resources, and preservation of ecosystem.

Reducing Environmental Impact by New ZAXIS

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. New ZAXIS utilizes lots of technological advances, including the new ECO mode, and Isochronous Control. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

These specifications are subject to change without notice.

Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features.

Before use, read and understand the Operator's Manual for proper operation.
